Omar El Hendawy

Technical Lead | Engineering Manager | Go, PHP, NodeJS, Python/Laravel | Agentic AI

AVAILABLE IMMEDIATELY

Cairo, Egypt +20 111 719 8333 omar.el.hendawy@outlook.com linkedin.com/in/omarelhendawy

PROFESSIONAL SUMMARY

Hands-on engineering leader building agentic AI tooling and production platforms in Go, PHP/Laravel, Python, and Node.js, from AI publishing pipelines and MCP-driven QA automation to Kubernetes and real-time systems. Senior Engineering Manager with 15+ years in software engineering: grows teams through hiring and clear functional leads, moves monoliths to service-oriented architectures, and raises delivery quality through metrics, calibrated reviews, and automated testing. Experience spans SaaS, travel, cybersecurity, and fintech, backed by a Business Administration degree.

CORE COMPETENCIES

Team Building & Hiring · Performance Management & 1:1s · Software Architecture & SOA · Scalability & Real-Time Systems · Delivery Metrics (DORA) · AI-Assisted Engineering & QA Automation · DevOps & CI/CD · Cross-Functional & Vendor Delivery

PROFESSIONAL EXPERIENCE

Remoteplatz | **Engineer / Technical Lead | AI & Web Platforms**

Feb 2024 – Present Belgium · Remote **Full-time**

Building and running AI-powered web platforms for a Belgian digital agency.

- **AI deployment pipeline:** built from scratch an AI web-publishing tool that takes AI-generated sites live, with SSL and Varnish setup, large assets moved to S3 and relinked, and deployment to Cloudflare or internal hosting, driven from a Claude Code interface
- **Agentic AI platform:** contributed to Edge Coworker (agents.edge.be) on security standards, performance optimization, and system design
- **Generative AI products:** built an AI face-swap greeting-card generator (AWS, Python, Replicate, Flux Schnell)
- **Scale:** led the revamp of a multi-tenant platform serving 10,000+ domains with AI-generated content, logos, and Apache Solr search, on current PHP and Caddy
- **Infrastructure:** moved 20 WordPress sites from legacy AWS EC2 to Hetzner bare metal with Varnish, Caddy, and Hitch; CI/CD with TeamCity and Bitbucket; took over multiple projects from outgoing engineers
- **Delivery:** led an events and learning platform (video, courses, quizzes, progress tracking) and a consumer entertainment site

Stack: Node.js, Python, PHP, Laravel, Drupal, WordPress, AWS, Hetzner, Cloudflare, Claude Code

Skills: Agentic AI Development, Generative AI, LLM Integration, Node.js, Python, Laravel, AWS, CI/CD

Confidential (restaurant and merchant SaaS platform) | **Senior Engineering Manager**

Jun 2025 – Sep 2026 Cairo, Egypt (Remote) **Contract**

Led engineering for a restaurant and merchant SaaS platform, growing the team from 6 to 20 engineers in about seven months.

- **Team:** hired across frontend, backend, DevOps, QA, mobile, and AI/DevOps functions, set up a lead structure with each lead reporting to me, and ran 1:1s and calibrated performance reviews; used DORA metrics as a guide for where to look, not to rank people
- **Architecture:** moved the platform from a monolith to a service-oriented architecture, extracting Go services and merging the Laravel backends onto Laravel 13, PHP 8.4, and FrankenPHP; moved the frontends to client-side rendering on S3 and CloudFront, running on Kubernetes with RabbitMQ and Centrifugo
- **Payments:** owned payment gateway integrations and the monitoring that catches third-party changes before customers see them
- **AI-assisted QA:** built an internal MCP server that turns Jira tickets into test cases and runs them through Playwright, moving QA from manual to automated

Stack: Go, PHP/Laravel, PostgreSQL, Redis, RabbitMQ, Kubernetes, AWS

Skills: Engineering Management, Team Leadership, Go, Laravel, Microservices, Kubernetes, Playwright

MacQueen | **Senior Software Engineering Delivery Manager**

Feb 2024 – Jun 2025 Cairo, Egypt **Contract**

B2C/B2B travel platform

- Re-platformed services onto Kubernetes, taking a platform that crashed at 10 users to 10,000+ concurrent users
- Re-architected real-time search from Node.js/PHP to a Go WebSocket engine, cutting search time from over two minutes to under 180 ms
- Introduced a multi-squad structure and Jira sprint analytics, raising feature delivery by 40% and velocity by 35%

PROFESSIONAL EXPERIENCE (CONTINUED)

Buguard | Engineering Manager

Oct 2022 – Aug 2024 Cairo, Egypt **On-site**

Cybersecurity company (threat intelligence, application security, penetration testing); products included DarkAtlas on Laravel 9

- Joined as the first engineer; selected the technology stack and built the engineering team
- Led and mentored the team; owned discovery-to-delivery for incremental releases to enterprise and mid-size clients, with product, design, and data teams
- Ran Elasticsearch at billions-of-records scale, designing indexing strategies for fast threat-intelligence search
- Led penetration-test remediation for Paysky, a fintech client

Homzmart | Lead Software Engineer (Backend)

Oct 2021 – Sep 2022 Cairo, Egypt

- Advanced the backend for a platform scaling toward millions of monthly active users: REST APIs within a service-oriented architecture, release and rollback strategy, coding standards, and mentoring

Meddaro | Technical Lead

Sep 2020 – Oct 2021 Cairo, Egypt

Telehealth platform connecting providers and patients across the Middle East

- Restructured modules, shipped features, and optimized the PHP/Laravel platform for speed and scale; owned delivery from specification to deployment

BE-STEAM | Software Engineer Team Lead

Sep 2019 – Aug 2020 Cairo, Egypt

Senior PHP Programmer (Sep – Nov 2019), then Team Lead

- Coordinated backend and frontend development from concept to post-launch; refactored the codebase for scale and managed team KPIs

VOO | Senior PHP Developer

Oct 2018 – Sep 2019 Cairo, Egypt

- Led backend, frontend, and mobile developers for a delivery aggregator; administered AWS infrastructure

Start Tag for Web Services | Project Manager

Jan 2018 – Oct 2018 Cairo, Egypt

GreenCandleFX | Software Development Project Manager

Mar 2015 – Jan 2018 Cairo, Egypt

Fintech: FX brokerage and digital currency exchange

- Managed scope, solution design, and delivery of ACCFX, a regulated FX broker platform, and Rich Wallet, a currency exchange integrating PayPal, Skrill, Neteller, and Vodafone Cash

EARLIER EXPERIENCE

2014 – 2015 **Senior Web Developer, Freight Talks** — freight logistics directory and payment gateway

2012 – 2013 **Senior Full Stack Developer, Helool** — web/API and Joomla development

2010 – 2011 **Web Designer and Developer, Orange Training Center**

TECHNICAL SKILLS

Primary stack: Go, PHP / Laravel, PostgreSQL, Redis, RabbitMQ

Also: Python / FastAPI, Node.js, React / TypeScript, Drupal, WordPress

Platform: Kubernetes, Docker, Centrifugo, Elasticsearch, Apache Solr, Varnish, Caddy, FrankenPHP

Cloud & CI/CD: AWS, GCP, Azure, DigitalOcean, Hetzner, Cloudflare, TeamCity, Bitbucket

AI & quality: MCP servers, Claude Code, Replicate, Playwright, DORA metrics

CERTIFICATIONS & EDUCATION

Zend Certified PHP Engineer · Zend Certified Architect · Professional Scrum Master (PSM) — in progress

Business Administration degree
